

Malk Partners Promotes Ryan Miller to Partner

Malk Partners is proud to announce the promotion of Ryan Miller to the position of Partner with the firm.

Ryan joined Malk Partners in 2014 and oversees all of Malk's client delivery. This includes ESG assessments on hundreds of transactions annually, representing over \$300 billion in equity commitments. More recently, Ryan established and is responsible for Malk's New York office.

"Ryan became a critical member of the Malk Partners team early in our growth, and we are pleased to recognize his significant contribution to building our firm with this promotion to Partner," said Andrew Malk, Founder and Managing Partner of Malk Partners.

Mr. Malk added, "Ryan's consistent strong judgment, determination, and excellence in delivering the highest quality of ESG advice to our clients, combined with his leadership of internal growth initiatives, have substantially expanded our presence in the market and meaningfully contributed to the success of Malk."

About Malk Partners

Malk Partners is the foremost consultancy advising private equity firms to create and protect value through environmental, social, and governance (ESG) management. We guide our clients across the fund and investment cycle to mitigate risk, secure opportunities and satisfy their investors. Malk supports global investors transacting around the world.

Our reputation is built from our singular focus on ESG management practices and exclusively advising private equity firms. We thoroughly understand our client's processes, collaborate closely with other vendors, calibrate our findings to materiality, and are extremely efficient with management and deal team time.

Malk is committed to helping our clients establish ESG management framework and investment processes that are deeply aligned to existing investment practices. We have advised many of the world's most respected investment firms helping them define ESG goals, conduct rigorous ESG due diligence reviews, and support portfolio companies in mitigating ESG risks.
